

The use of chilled or frozen semen provides exciting opportunities for mare owners to choose from a wide variety of quality stallions located almost anywhere. Unfortunately many have found the A.I. breeding process difficult, time-consuming, expensive, and often frustrating. It doesn't have to be that way.

Let us show you how to achieve cost effective success with your A.I. breeding program. We will take the hassle out of the process while handling all of the details for you. Call or visit us today!
